

# REPORT: SWINEFLU AWARENESS CAMPAIGN

As a part of **66<sup>th</sup> Republic Day** celebrations, we, Team VNRSF with the support of management, took the initiative and came forward to bring out the awareness about the symptoms and effects of contagious viral disease **Swine Flu** that was rampant across the city and also to distribute the vaccine for the disease. We deliberated upon the area to be chosen and the due process to be followed in spreading the awareness and also to allay the fears of pervasiveness of the disease.

The coalescent spirit of all the members of **Team VNRSF** helped to complement the success of the event.

## Event details:

The activities under the event include distribution of protective masks and swine flu medicine to over **700 families** in Mallampet village and to the residents of sai nagar. With the cooperation of the organisation **UARDT**, we could distribute swine flu medicine to **staff and students of VNRVJIET**, to the students of private hostels and also of gayathri intermediate college. We also gave medicines at JMJ Sadan, an orphanage, and at Shiridi Sai Oldage Home. This event not only benefited the **6000 people** who received medicines but also our Team who got to visit different places throughout the event and learnt to deal with people and organisations. The day left us with nothing but immense satisfaction and enthusiasm which always keep us going.
